Accountability Standards

(Adopted by the IFPO Board on March 15, 2003)

Introduction

The IFPO Board of Directors serves the public and the security profession by offering a certification program that recognizes protection officers, security supervisors and protection officer instructors who are committed to the highest standards of ethical and professional practice. The IFPO Board of Directors establishes and administers a voluntary certification process based on current and valid standards that measure competency in the practice of private security.

Because the IFPO Board of Directors is responsible for ensuring the integrity of the credentials awarded, the Board has adopted a set of accountability standards related to the certification process. These standards exist to protect the public from those who would seek to misrepresent their qualifications or their status as security professionals. All individuals applying to, or certified by, the IFPO Board of Directors must comply with these standards.

It is likely that most professionals certified by the IFPO will belong to one or more professional security association that have codes of ethics related to the profession and the practice of security. The IFPO Board of Directors in contrast focuses solely on actions and principles related to certification and the certification process.

However, in those instances wherein:

1. an individual holding an IFPO credential is disciplined or sanctioned for violation of the Code of Ethics or Standards or Practice of his or her professional association or
2. any organization involved in or connected to the profession, including regulatory agencies, takes action against the individual for reasons associated with professional misconduct, malfeasance, or unethical behavior

Then the IFPO Board of Directors will consider taking action. The IFPO Board of Directors is most likely to take action when an individual's action clearly violates the integrity of the profession and/or universally accepted values and standards for the security profession. In nearly all such instances, an individual who violates a code of ethics that was signed voluntarily has breached IFPO's core values of honesty and integrity.

Preamble

The IFPO Board of Directors, through the certification process, promotes the integrity and quality of the security profession.

Accountability Standards

As an applicant for re-certification from the IFPO Board of Directors, I submit that I subscribe to and am in compliance with the following accountability standards:

1. All information on my application for re-certification is accurate , truthful, and complete.
2. I will not make any statements concerning my certification status, which are, or which could be construed to be false of misleading. I will correct any such misstatements immediately.
3. I will protect the IFPO's federal and/or international trademarks and use my certification designation(s) only in the manner permitted by the IFPO Board of Directors. In addition, I will report to the IFPO, any instances of misuse of any IFPO credential of which I become aware.

4. I will not transmit information regarding examination questions in any form at any time. Nor, will I accept or receive information regarding exam questions from any source other than the IFPO itself.

5. I will comply with all ethical and professional standards adopted by those professional organizations in which I hold membership.

I understand that violation of any of these accountability standards subjects me to the revocation of my certification credential and to possible legal action. I also understand that if my actions include behavior that is inconsistent with the integrity of the profession, I may also be subject to revocation of my certification credential.

I have read and understand these Accountability Standards of the IFPO Board of Directors and I agree to be bound by them.
