

WOMEN IN THE SECURITY PROFESSION

A Practical Guide for Career Development

Sandi J. Davies

Women in the Security Profession: A Practical Guide for Career Development

Sandi J Davies Executive Director, International Foundation for Protection Officers (IFPO)

Comprehensive and actionable career development advice for women who are considering a career in security or currently in the field of security and looking for an even brighter future.

KEY FEATURES

- Features career profiles and case studies, including interviews with women in the industry and expected trends
- Offers experienced advice on how to resolve specific biases and issues relating to gender

DESCRIPTION

Women in the Security Profession is a resource for women considering a career in security, or for those seeking to advance to its highest levels of management. It provides a historical perspective on how women have evolved in the industry, as well as providing real-world tips and insights on how they can help shape its future.

This comprehensive text helps women navigate their security careers, providing information on the educational requirements necessary to secure a wide range of positions in the security field today. Women in the Security Profession: A Practical Guide for Career Development describes many available opportunities, as well as offering guidance from experienced women professionals who have risen through the ranks of different security sectors.

"When analyzing the role of women in security today, we are basically analyzing the obvious discrepancy between the place of women in security and their actual potential.

Marco Cabric

"There is a prominence of women in our unique profession today, but it's hasn't always been the way. There was a time when, in my lifetime, women were not seriously considered for roles in crime or crime prevention business in the public or private sector, with few exceptions."

Charles Sennewald, CPP, CSC, CPO

"Times have changed and if you don't change, then it is time for you to either retire or get another job. Woman do a better job than men in specific duties."

Lawrence Fennelly, CPOI, CSSM, CHSIII
